

Construction Notice for

ARAM Installation

Fiscal Year 2012-13 Slurry Seal Program

General Contractor: Toro Enterprises

Part of the City's annual maintenance effort is the Street Slurry Seal Program. This Project Involves Installation of Asphalt Rubber Aggregate Membrane (ARAM) on existing pavement, and emulsion aggregate slurry over the ARAM. This method restores the appearance of the pavement and prevents further deterioration of the pavement.

While this operation is being performed, please remember:

- Access to your street will be restricted between 7:00 AM and 5:00 PM, while ARAM is being installed.
- Street parking is not allowed and signs will be posted accordingly at least 30 hours in advance of parking enforcement. Please adhere to the parking restrictions posted.
- Parking will be available within a reasonable distance to your house.
- When access is restricted, detours will be set up to help you reach your destination.
- If ARAM Installation occurs on trash collection day on your street, trash will be picked-up as normal.
- Refrain from using irrigation, sprinklers or watering on the day of slurry seal.
- There might be some loose gravels during and few days after ARAM Installation. Please drive safely.
- Installed ARAM is not the finish surface of your street. It will receive a layer of slurry seal in near future and you will receive another notification for the scheduled slurry seal.

We appreciate your cooperation and understanding while we work to improve your City.
